

# FEB 8TH 2023 - ASPE POLYPROPYLENE PIPING PRESENTATION - DEMO

## Midwest Spec is proud to host February's Lunch & Learn for Cleveland ASPE

PP-R Piping has been around for the last 50 years in the Plumbing and HVAC industry, gaining momentum and following in various niche markets across North America, providing a superior pipe over the general industry standards. The strength of this alternate technology was historically the speed and ease of installation as well as the properties of this engineered Plastic over steel or copper pipe. Recent price increases and diminished supply of metal piping over the last couple years has created a surge in PP-R usage and demand, and now we're seeing new interests from owners and engineering firms as well as repeat business from the companies that have used it successfully and see the multiple benefits of its capabilities and properties.

Please RSVP by February 3<sup>rd</sup> by sending an email confirmation to [clesales@mwspec.com](mailto:clesales@mwspec.com), you will receive a confirmation reply.

**Top 10-Reasons why  
you want to use PP-R**

**Understand the  
Fusion Process and  
installation  
requirements**

**What are the  
Pressure and  
temperature  
Capabilities**

**Live Fusion Demo's  
provided on site**

**RSVP BY FRIDAY  
FEB. 3rd
