# PROUDLY PROVIDING THERMOSTATIC BALANCING SOLUTIONS FOR OVER 10 YEARS

 **CircuitSolver**<sup>®</sup>  
A ThermOmegaTech<sup>®</sup> brand

### Hot Water Recirculation

In 2012, CircuitSolver<sup>®</sup> was developed to conquer the challenges inherent to conventional manual balancing valves. As the market's first **thermostatic balancing valves** used for domestic hot water recirculation, CircuitSolver<sup>®</sup> balances a system based solely on temperature as opposed to pressure or flow to guarantee hot water at **every fixture**. Dynamically balancing a system, CircuitSolver<sup>®</sup> ultimately **ended complaints** about the lack of hot water, and eliminated balancing processes and callbacks.

### Cold Water Recirculation

Last year, we implemented our thermal actuator technology into the CircuitSolver<sup>®</sup> Union Cold Water balancing valves. These valves are installed in domestic Cold Water recirculation systems to mitigate the risk of Legionella and other bacterial growth. Cold water recirculation is becoming more prominent in hospitals to reduce water stagnation and ensure residual chlorine is distributed but can be beneficial to any commercial building that could experience periods of low flow or non-use.
